

Iowa Fluid Power and Electro-Hydraulic Automation, Inc. a leading manufacturer of custom fluid power and motion control solutions, located on the northeast side of Cedar Rapids, has immediate needs for:

Fabricator

Applicants must have a minimum of two years experience with industrial equipment. Primary job functions will be fabricating hydraulic equipment, plumbing, welding and wiring of hydraulic and electrical systems.

Hydraulic Service Mechanic

Ideal candidate will have strong technical and mechanical aptitude and the ability to quickly learn hands-on knowledge of hydraulic components. Outstanding communication skills and trouble-shooting ability needed. Requires travel for on-site customer service.

Welder

Applicants must have a minimum of two years MIG welding experience in industrial setting. TIG welding, metal fabrication, and painting skills also a plus.

Become part of an ever-growing business in a challenging field. Competitive benefit package includes medical, dental and vision plans, 401(k) and Profit Sharing, health club subsidies, vacation and sick time, as well as paid holidays at start date. Send cover and resume for above positions to Iowa Fluid Power, Attn: HR, PO BOX 10495, Cedar Rapids, IA 52410, or email hr2010@ifpusa.com.

Database Administrator/Reports Developer

Iowa Fluid Power is seeking a full-time database administrator to work from the ground up on install and customization of new enterprise resource planning (ERP) software for distribution and light manufacturing.

Candidate will provide support for implementation of the ERP, and well as pulling data and writing reports from a Microsoft SQL server database. Must have excellent interpersonal, communication and organizational skills and be able to establish priorities and work independently. Work with different departments and management team to translate requirements into technical specifications and produce reports.

Skills and requirements:

- Degree in Computer Science or related field
- Experience with SQL queries and object oriented programming
- Experience with data integration between MS-SQL and MS-office applications.
- Minimum 2 years experience in a small business environment
- Crystal Reports or other SQL based report writer experience required

Additional Skills:

- Programming experience a plus (VB.NET, ASP.NET preferred)
- Some network experience or familiarity also a plus

Iowa Fluid Power is a privately held company founded in 1972 and a leader in motion control solutions. For more information, visit www.ifpusa.com.

We offer a competitive salary commensurate with experience, benefits package including profit sharing and 401(k), casual work environment, and friendly atmosphere.

To apply, send a resume with salary requirements and cover letter to:

hr2010@ifpusa.com

A pre-employment background check and drug screen are required.

Warehouse Associate

Iowa Fluid Power and Electro-Hydraulic Automation, Inc. a distributor and manufacturer of custom fluid power and electronic systems controls, located on the northeast side of Cedar Rapids, is looking for an entry level laborer to join our warehouse group.

Duties will include building pallets, putting away stock, operation of a fork truck, and general warehouse cleaning and maintenance duties. The ideal candidate will demonstrate ability to follow directions, paying close attention to detail, have working knowledge of hand and air tools, and face each new challenge with a positive attitude.

Competitive benefit package includes 401(k) and Profit Sharing, medical, dental and vision plans, and fitness club membership. Send cover letter and resume to Iowa Fluid Power, Attn: HR-WHS, PO BOX 10107, Cedar Rapids, IA 52410-0107, or email hr2010@ifpusa.com.
