

# eSmart Mobile

electric power solutions

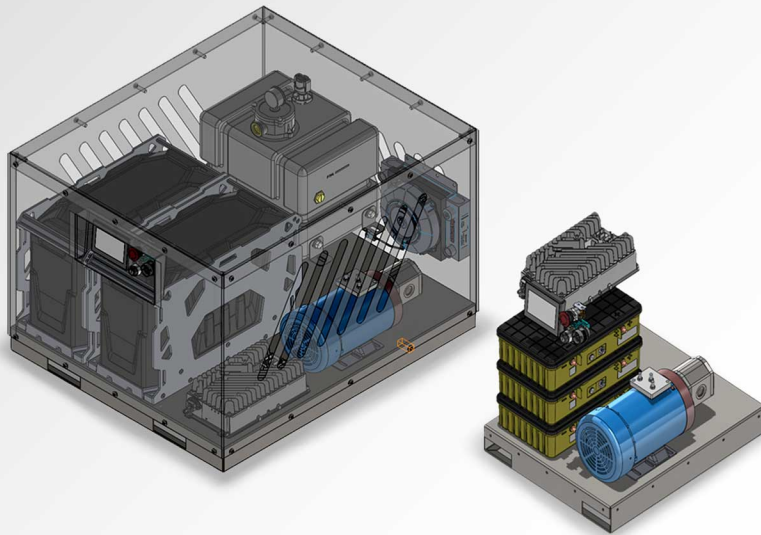

reduce noise | reduce complexity | reduce fuel

# fewer components | simple design | clean energy

IFP's universal & hydraulic drives reduce maintenance, increase up-time, lower noise, emissions, and increase job safety and productivity.

## Able to deliver full systems including:

- Batteries
- Motors and controllers
- Charger
- HMI Display and controllers
- DC/DC Converters
- AC Inverters
- Hydraulic design and optimization
- Wire harness design
- Fabrication & packaging system

IFP's simple design allows for swift conversion to electric battery power.

Reduced maintenance, safe, easy installation, & operation

Reduce fuel consumption & ~80% noise reduction

Electric powered equipment yields ~50% cost savings

Emission free job sites can be achieved with the IFP eSmart Power Unit. Add a standard or custom turn-key eSmart Power unit for any OEM and retro-fit configurations.
